Georgia 7 Pie Narrative Description

We have made plans and designs for the following improvements at the 7 Pie location at 40 N Grove Street. Exterior revitalization with fresh paint pictured in the renderings. We're adding some barn wood cladding to the front of the building over the awning which will add character but stay in keeping with the type of construction of the building. We will bring the patio back to life by sanding and refinishing the wood deck and railings with a neutral stain (depicted in the renderings). We are replacing the heavy metal barn door at the patio with a roll up style garage door (seen in the renderings). At the patio we are adding, one window that matches the size and construction of the two existing windows up front. This window will be custom fabricated to match the existing windows up front. We depicted two smaller windows in the renderings at the patio that will be constructed in a custom manner to match the materials and finishes of all existing windows.

We're adding a walk-in freezer / cooler as required by DHEC at the rear of the building. This 204sqft addition will be constructed with CMU curtain walls and corrugated metal siding to match the existing building. Additionally, this cooler will be painted to match the rest of the building. This addition can be visualized in the renderings and can be seen on the site plan provided. We intend to place a code compliant dumpster enclosure on the Southeast corner of the property (where the previous owners kept) to serve the restaurant.

**STAFF REPORT FOR HISTORIC PRESERVATION COMMISSION
REQUEST FOR CERTIFICATE OF APPROPRIATENESS**

Case No: COA-24-1

Parcel: D11-047

Address: 40 Grove Street North

Petitioner: Josh Parker, Grove St Property LLC

Work Session Date: March 13, 2024

Voting Session Date: March 25, 2024

Zoning: CBD: CENTRAL BUSINESS DISTRICT

The Central Business District is intended to establish and preserve a compact central business district convenient and attractive for a wide range of retail uses, business transactions, government and professional offices, places of amusement, employment activities, and services to the public designed primarily to meet the day-to-day shopping and service needs of residents of the City of Dahlonega.

Zoning History: None

Nature of Request:

Material Changes in Appearance and Exterior Architectural Modifications

- Sanding and refinishing of patio with a neutral wood stain.
- Replacement of metal barn door with roll-up garage door.
- Three new windows by the patio of custom fabrication to match existing windows.
- Wood cladding of the front façade, above the awning.

Structural Addition

- 204 square foot walk-in cooler at the rear of the building, to be painted to match the existing building.

Note: The applicant has also proposed the repainting of the exterior façade of the existing building. However, exterior repainting is outside of the scope of consideration per local and state guidelines.

Findings and Analysis:

Section 109-20(d) of the City of Dahlonega Historic Preservation Ordinance authorizes the Dahlonega Historic Preservation Commission to review applications for Certificate of Appropriateness (COA). Section 2502 of the Dahlonega Zoning Ordinance requires the approval of a COA prior to any material change of appearance for any building within a designated Historic District.

The Lumpkin County Board of Assessors indicates that the building was constructed in 1978. The submitted site plan corresponds with the recorded footprint of the building. The structure was previously used by the Lumpkin County Farmer’s Association and for retail activities.

In reference to the Dahlonega Historic District Design Guidelines, staff has identified the following to be brought to the attention of the Commission:

4.2 Windows and Doors:

The applicant has proposed the replacement of the metal barn door at the side of the building, providing access from the interior to the patio. A roll-up style garage door will be installed in its place. The rendered door has a transparent, paneled surface, which is not a common style in the vicinity. This change may impact the functionality of the door.

Recommendations:

Staff recommends approval of COA-24-1, as the proposed changes maintain reasonable consistency with the character of other retail buildings in the vicinity.
